

Measurements Hames:

Measure the Length from top of the ratchet to the bottom of the hame. Line should be straight, not conforming to horses body. Hames are always in even sizes every two inches, for example they come in 24", 26", 28", 30" etc. When matching to a collar get hames that are one size bigger than the collar. If a collar is 21" to 23" order 24" hames.
